

## 1. DataBase Connectivity

Activity\_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <EditText
        android:layout_width="match_parent"
        android:layout_height="match_parent"
        android:id="@+id/e"/>
</LinearLayout>
```

MainActivity.java

```
package com.example.database;

import ...

public class MainActivity extends AppCompatActivity {
    EditText text;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        DemoDatabase db=new DemoDatabase( this);
        SQLiteDatabase sqldb=db.getReadableDatabase();
        ContentValues values=new ContentValues();
        values.put("price",80);
        sqldb.update( table: "products",values, whereClause: "id=?",new String[]{"1"});
        Cursor c=sqldb.rawQuery( sql: "select * from products",new String[]{});
        if (c!=null){
            c.moveToFirst();
        }
        StringBuilder builder=new StringBuilder();

        do {
            int id=c.getInt( columnIndex: 0);
            String name=c.getString( columnIndex: 1);
            String desc=c.getString( columnIndex: 2);
            Double price=c.getDouble( columnIndex: 3);
            builder.append("ID:"+id+"\n NAME:"+name+"\n DESCRIPTION:"+desc+"\n PRICE:"+price+"\n");
        }while (c.moveToNext());
        text=findViewById(R.id.e);
        text.setText(builder.toString());
    }
}
```

## DemoJob.java

```
package com.example.database;

import ...

public class DemoDatabase extends SQLiteOpenHelper {
    static String dbname="mydb";
    static int version=1;
    public DemoDatabase(Context ct) { super(ct, dbname, factory: null, version); }
    @Override
    public void onCreate(SQLiteDatabase db) {
        String sql="Create table products(id integer Primary key autoincrement,name text,description text,price real)";
        db.execSQL(sql);
        insertData( name: "bread", description: "Brown bread", price: 40.0,db);
        insertData( name: "jam", description: "mixed fruit", price: 65.0,db);
    }

    public void insertData(String name,String description,double price,SQLiteDatabase db){
        ContentValues values=new ContentValues();
        values.put("name",name);
        values.put("description",description);
        values.put("price",price);
        db.insert( table: "products", nullColumnHack: null,values);
    }
    @Override
    public void onUpgrade(SQLiteDatabase db, int oldVersion, int newVersion) {
    }
}
```

</LinearLayout>

```

## OUTPUT:-

The screenshot displays a mobile application interface with a teal header bar containing the title "RegisterusInputtype". Below the header, the form is organized into five rows, each with a label on the left and a corresponding input field on the right. The input fields are represented by their respective Java Swing class names: `EditTextField` for Name, `textPasswordField` for Password, `TextMultilineField` for Address, `textEmailAddressField` for Email, and `NumberField` for Contact. Each input field is visually represented by a horizontal line.

Label	Field Type
Name	<code>EditTextField</code>
Password	<code>textPasswordField</code>
Address	<code>TextMultilineField</code>

```

## OUTPUT:-

The screenshot displays a mobile application interface for a registration form. At the top, a teal header bar contains the title 'RegistrationForm'. Below this, the form is titled 'REGISTRATION FORM' in red. The form includes several input fields and options: a 'NAME' field with a red label and placeholder text 'Type here'; a 'SURNAME' field with a red label and placeholder text 'Type here'; a 'GENDER' section with two radio button options, 'MALE' and 'FEMALE', both with red labels; a 'CONTACT' field with a red label and placeholder text 'Type here'; a 'COURSES' section with four checkbox options: 'JAVA', 'ANDROID', 'ALGORITHMS', and 'WEB', all with red labels; a 'MONTHS SUBSCRIPTION' field with a red label and a dropdown arrow; and a 'TEST ASSISTANCE' section with a red label and a toggle switch. At the bottom of the form is a large grey button labeled 'SUBMIT' in red. The entire form is set against a light grey background. The top of the screen shows a status bar with the time '1:20' and various icons. The bottom of the screen shows a black navigation bar with standard Android navigation icons.
